Continuation of 3, NOTE: The addition of "entire" in claims 20 and 36 raise new issues requiring further consideration.

Continuation of 11, does NOT place the application in condition for allowance because: Applicant asserts that Raman et al. fails to disclose a cladding which surrounds the distal tapered portion of the guidewire. Applicant notes that Raman et al. taches "at least a section of superelastic alloy [being] exposed". However, it is clear form the disclosure of Raman et al. and Figure 1 that the cladding surrounds the portion of the core wire formed of a super elastic nicket litanium alloy. The claims do not require the jacket being around the whole portion of the core wire formed of a super elastic nicket litanium alloy.
